## REAR UPPER TRAILING ARM COMPATIBLE WITH TOYOTA LANDCRUISER 200 SERIES

Heavy Duty Offset Rear Upper Trailing Arms now available to suit the 200 series Landcruiser. Featuring heavy duty 26.8mm OD cold drawn precision steel tube (STKM11A) with 5.5mm wall thickness combined with OE spec rubber bushings the new arms offer increased durability for all your off-roading adventures. The genuine arm can be one of the limiting factors when looking for increased articulation. The new Blackhawk Landcruiser 200 Series offset rear upper trailing arms provide increased clearance to the factory fuel tank and allow for the potential increase in down travel when used with longer shocks.

### Part Number TALC201B

Rear Upper Trailing Arm
