UPPER CONTROL ARMS TO SUIT HOLDEN COLORADO RG

UCA4727C & UCA4670C KEY FEATURES

- Fully forged arm with strength well surpassing NCOP requirements
- Complies with ADR requirements for strength and direct fitment
- Intricate bends allow for strut & wheel clearances
- Includes droop stop strike plates in line with OE arm for ADR compliance
- Brake and ABS line mounting tabs included for increased clearance and ADR compliance
- Scalloped inner arm to cater for larger aftermarket strut clearance
- Fixed heavy duty greasable ball joint
- Re-positioned ball joint to allow for maximum articulation
- OE dimension specifications applied to bushings and ball joint
- Suits lift 30-60mm – up to 525mm extended strut length
- Fixed increased caster built into the arm
- Provides the ability to adjust camber back to specification on lifted vehicles
