HEAVY DUTY UPPER CONTROL ARM COMPATIBLE WITH NISSAN NAVARA D22

The new heavy duty Blackhawk range of Upper Control Arms have been designed with ease of fitment & ongoing serviceability in mind, and are a necessity for various IFS models that have been lifted 30mm+ . The Blackhawk arms have been designed to restore camber & caster lost on the IFS vehicles once they have been lifted, by correcting the angle of the ball joint.

Without restored camber & caster settings lifted IFS vehicles will eventually show excessive tyre wear and experience ride & steering issues. With greater radius and tube sizing to suit per application, the designs allow clearance of the coils during articulation, with the outer radius also adjusted to allow for the fitment of larger tyres without having the issue of the tyres rubbing on the arms during full lock (full suspension cycling required during fitment to determine clearances at maximum droop, bump , wheel and tyre size).

The majority of applications in the Blackhawk Upper arm range are designed with 3 degrees fixed caster, and are optimally suited to lifts of 30-70mm, finished in black E-Coating for maximum durability, rust prevention and discreet installation.

Part Number UCA4821N

Nissan Navara D22 Upper
Control Arm Kit
