UPPER CONTROL ARM

COMPATIBLE WITH MITSUBISHI TRITON MQ/MR & PAJERO SPORT

Newly released is the UCA4729Q for the current range of Mitsubishi Triton MQ, MR & the Pajero Sport. Upgrades include a fixed amount of increased caster with a small change to camber correction, improving the bulk of wheel alignment issues with increased clearance. This allows the factory lower control arms to be used to fine tune wheel alignments. Featuring increased clearance of the control arm to the suspension strut allowing for larger struts to be installed without the common clearance issues associated.

- Retains factory droop stop – with customisable height shims
- 2 stage coating w E-Coat & Gloss black powder Coat
- Hi Articulation Roadsafe 4WD HD Ball joint (OE Sized)
- 2 degrees increased caster
- OE size rubber bushings
- ADR compliant for street use!
*engineering required
- Retains all brakeline and ABS line mounts
- Drivers side ADJ Headlight mount inc.

**SUITABLE
TO FIT WITH
17" RIMS ONLY**

Part Number UCA4729Q

Upper Control Arm compatible with
Mitsubishi Triton MQ/MR & Pajero Sport
