UPPER CONTROL ARMS

COMPATIBLE WITH ISUZU RG DMAX - MAZDA BT50 2019+

UCA4727D compatible with current generation Isuzu Dmax & Mazda BT50 offers a 2 degree increase in caster and a camber improvement helping correct geometry on all lifted vehicles up to 70mm of lift.

Manufactured from seamless 6mm thick DOM tube adjoining an OE spec heavy duty greaseable ball joint offering increased articulation over the OE unit. Like all our UCA designs, UCA4727D feature OE spec rubber bushings for maximum NVH control maintaining the factory ride comfort. Completely CAD designed, engineered and FEA validated in house at ROADSAFE to be completely street legal. *with engineering.
