UPPER CONTROL ARMS COMPATIBLE WITH NISSAN NAVARA D22

Blackhawk UCA4821N (Nissan Navara D22 upper control arms) will not suit if used with the factory 4 spoke Navara alloy wheels.

To use the Blackhawk UCA4821N Upper Control Arms the vehicle will need to be fitted with aftermarket wheels that have more negative offset when compared to OE wheels.

Once UCA's have been fitted to the vehicle, the fitter must cycle the suspension fully to ensure no fouling or contact is made between the UCA and wheel, or any other suspension components.
